Forward Looking Statement

This presentation includes certain “forward-looking statements” within the meaning of section 21E of the United States Securities Exchange Act of 1934, as amended. Forward-looking statements include without limitation, statements regarding future production, potential mineralization and reserves, exploration results and future plans and objectives of Eagle Plains Resources Ltd (Eagle Plains). Forward-looking statements can generally be identified by the use of forward-looking terminology such as “may,” “will,” “expect,” “intend,” “estimate,” “anticipate,” “believe,” or “continue” or the negative thereof or variations thereon or similar terminology. There can be no assurance that such statements will prove to be accurate and actual results and future events could differ materially from those anticipated in such statements. Important factors that could cause actual results to differ materially from expectations are disclosed under the heading “Risk Factors” in Eagle Plains Resources 2022 Annual Report and under the heading “Trends, Risks, and Uncertainties” in the Eagle Plains 2022 Annual Information Form (AIF) which is filed with Canadian regulators on SEDAR (www.sedar.com).

Vulcan 2022/23 EPL Funded Drill Programs

- Eagle Plains conducted self-funded drill programs in 2022 and 2023 at its Vulcan Property located in SE B.C. to test for Sullivan style (“SEDEX”) mineralization
- A 5 hole drill program in 2023 followed up a 262.9m intercept from the 2022 drill program that indicated close proximity to a lead-zinc mineralized feeder system analogous to the Sullivan Mine geology (see explanation video below)
- All five holes in the 2023 drill program intersected critical metal mineralization and sedimentary-exhalative (“sedex”) style alteration over significant widths and over a broad area although not in economic concentrations. These results will help to guide future drilling
