

Slocan Graphite (Large Flake Graphite)

Black Crystal Graphite
Quarry 17 km

Tedesco Showing:

- Discovered in 2000
- Defined based on a cluster of more than 20 grab samples
- Spatially associated with the EM anomaly

Tedesco Conductor:

- 2010 Airborne EM anomaly

Historic Rock Sampling

- Grab Sample:
- Up to 4.43% Organic Carbon Contents

2021 Rock Sampling

- Grab Sample:
- Up to 4.78% Total Carbon Contents

3 Drill Holes:

- Drilled in 2008 to test for graphite
- Limited graphite encountered
- Similar host lithologies to that of the Black Crystal Graphite Deposit
- Interpreted to have been drilled below the Tedesco stratigraphy

Eagle Graphite
Processing Facility

**Eagle Plains
Resources Ltd.**

EPL:TSX-V

LEGEND
