

# Slocan Graphite (Large Flake Graphite)

Black Crystal Graphite  
Quarry 17 km

## Tedesco Showing:

- Discovered in 2000
- Defined based on a cluster of more than 20 grab samples
- Spatially associated with the EM anomaly

## Tedesco Conductor:

- 2010 Airborne EM anomaly

## Historic Rock Sampling

Grab Sample:  
- Up to 4.43% Organic Carbon Contents

## 2017 Rock Sampling

Grab Sample:  
- Up to 3.36% Organic Carbon Contents

## 3 Drill Holes:

- Drilled in 2008 to test for graphite
- Limited graphite encountered
- Similar host lithologies to that of the Black Crystal Graphite Deposit
- Interpreted to have been drilled below the Tedesco stratigraphy

Eagle Graphite  
Processing Facility

**Eagle Plains  
Resources Ltd.**  
EPL:TSX-V

## LEGEND

- Mineral Occurrence
- Rock Samples
- Historic Drilling
- Logging Road
- Property Boundary
- Geophysical Anomaly  
(October 2021)
