

Slocan Graphite (Large Flake Graphite)

Black Crystal Graphite
Quarry 17 km

Eagle Graphite
Processing Facility

Tedesco Conductor:
- 2010 Airborne EM anomaly

Tedesco Showing:
- Discovered in 2000
- Defined based on a cluster of more than 20 graphitic grab samples
- Spatially associated with the EM anomaly

**Eagle Plains
Resources Ltd.**
EPL:TSX-V

LEGEND

- Rock Samples
- Mineral Occurrence
- Historic Drilling
- Logging Road
- Geophysical Anomaly
(June 2019)

3 Drill Holes:
- Drilled in 2008 to test for graphite
- Limited graphite intercepts encountered
- recognized similar host lithologies to that of the Black Crystal Graphite Deposit
- Interpreted to have been drilled below the Tedesco stratigraphy

Historic Rock Sampling
Grab Sample:
-Up to 4.43% Organic Carbon Contents

2017 Rock Sampling
Grab Sample:
-Up to 3.36% Organic Carbon Contents

Castlegar
28 km
