

George Lake Project (SEDEX)

**EAGLE PLAINS
RESOURCES**

TSX-V:EPL

George Lake Zones

Both the George Lake and Spence Lake Zones are highly prospective for SEDEX Pb-Zn-Ag mineralization

Spence Lake Zone

Drill Intercept:

- 1.5m @ 0.3% Zn, 0.65% Pb, 0.9% As, 23.9 g/t Ag

Spence Lake Zone

- Potential for both Sedex and vein-hosted critical-metal mineralization
- Coincident geophysical anomalies (Mag/EM)
- Prospective and Underexplored

George Lake Zone

Drill Intercept:

- 10.67m @ 2.83% Zn
- 4.2km SW of deposit

George Lake Zone

Drill Intercept:

- 16.77m @ 4.27% Zn (6.1m @ 6.18% Zn)
- 3.1km NE of deposit

George Lake

Conceptual Exploration Target

- 2-5 MT @ 3-5% Zn and 0.5-1.5% Pb
- Lensoid in shape - 800m long, 35m thick and up to 150m deep
- Open to depth and along strike
- Contains a high-grade core >5% Zn

George Lake Zone

Drill Intercepts:

- 47.75m @ 4.5% Zn, 0.61% Pb, 3.49 g/t Ag (8m @ 6.96% Zn, 1.42% Pb, 5.91 g/t Ag)
- 57.9m @ 3.42% Zn (9.1m @ 7.1% Zn)
