

# George Lake Project (SEDEX)

**EAGLE PLAINS  
RESOURCES**  
TSX-V:EPL

**George Lake Zones**  
Both the George Lake and Spence Lake Zones are highly prospective for SEDEX Pb-Zn-Ag mineralization

**Spence Lake Zone**  
Drill Intercept:  
- 1.5m @ 0.3% Zn, 0.65% Pb, 0.9% As., 23.9 g/t Ag

**Spence Lake Zone**  
- Potential for both Sedex and vein-hosted critical-metal mineralization  
- Coincident geophysical anomalies (Mag/EM)  
- Prospective and Underexplored

**George Lake Zone**  
Drill Intercept:  
- 10.67m @ 2.83% Zn  
- 4.2km SW of deposit

**George Lake Zone**  
Drill Intercept:  
- 16.77m @ 4.27% Zn  
(6.1m @ 6.18% Zn)  
- 3.1km NE of deposit

**George Lake Deposit**  
- 2.63 MT @ 3.67% Zn and 0.53% Pb\*  
- Lensoid in shape - 800m long, 35m thick and up to 150m deep  
- Open to depth and along strike  
- Contains a high-grade core >5% Zn  
\* Historical resource (non 43-101 compliant)

**George Lake Zone**  
Drill Intercepts:  
- 47.75m @ 4.5% Zn, 0.61% Pb, 3.49 g/t Ag  
(8m @ 6.96% Zn, 1.42% Pb, 5.91 g/t Ag)  
- 57.9m @ 3.42% Zn  
(9.1m @ 7.1% Zn)

	Mineral Occurrence
	Drill Collar
	All-Season Road
	Area of Trenching
	George Lake Bouldertrain
	Geophysical Conductors
	George Lake Deposit
	Mineralized Trend
	Geophysical Anomaly
	Property Boundary (November 2024)

This area qualifies for the Mineral Exploration Incentive Program
